

ProAc RESPONSE FIVE

Incredible openness, smoothness and neutrality **- A sublime listening experience.**

The new Response Five is a remarkable fulfilment of a design concept which has been developed and refined through many successful models over the last few years. Response range loudspeakers have always incorporated the finest components and materials available regardless of cost. The new Fives take that philosophy a stage further, utilising cutting edge technology and inspired design to blend exceptional detail and accuracy with a beguiling musicality.

The cabinets are tall, slim and deep. Not only are they extremely elegant but also perfectly proportioned for minimum cabinet distortion and maximum dispersion.

Each cabinet houses four state-of-the-art drive units. Two ProAc seven inch bass drivers provide the incredibly extended and powerful bass response, which will be a delight for lovers of organ, large orchestral and rock programme. These drivers are reflex-loaded by twin rear equalised ports.

 **ProAc**
perfectly natural

The midrange is handled by an uprated three inch soft dome unit with ribbon wound voice coil and double suspension. This driver delivers the most detailed and open sound, never prone to harshness and completely unfatiguing.

The tweeter is another gem; an entirely new three-quarter inch dome unit with a special cork-clad front plate to reduce unwanted resonances. Smooth, open and natural, this unit displays a wonderfully delicate quality with perfect harmonics, giving the Fives an exceptional neutrality.

As ever, our build quality is unrivalled. Radically solid cabinet construction and damping allows the drive units to give optimum performance, whilst internal components and wiring in the elaborate crossover design are of the finest quality available.

The Response Fives are loudspeakers which will encourage hour after hour of continuous listening, on any kind of music. Their intoxicating sound will provide years of profound musical satisfaction.

SPECIFICATION

Nominal Impedance:	8 ohms
Recommended Amplifiers:	50 to 350 watts
Frequency Response:	20hz to 30Khz
Sensitivity:	87db for 1 watt at 1 metre
Bass Drivers (2):	ProAc 7" (178mm) special carbon fibre cone with very linear motor system, cast chassis and large magnet assembly with breather.
Midrange:	Studio quality 3" (76mm) soft dome with three inch ribbon wound voice coil and double suspension.
Tweeter:	ProAc ¾" (19mm) soft dome unit with exclusive cork-clad front plate, unique coating and special rear loading. Honeycomb wound voice coil.
Crossover:	Super high grade fibreglass base with high purity heavy grade tracking. AC chokes, silvered capacitors, high wattage ceramic resistors.
Dimensions:	54" (1372mm) high on plinths with spikes 10" (254mm) wide 15" (381mm) deep
Mode:	Floorstanding on dedicated plinths and spikes
Grille:	Acoustically transparent crimplene
Weight:	132lbs (60kg)
Finish:	Available in the following real wood veneers: Black Ash, Walnut, Natural Oak, Mahogany, Cherry, Rosewood, Yew, Ebony, Bird's Eye Maple, Burr Oak

* Due to our policy of continuous improvement all specifications are subject to change without notice. Cabinets pictured are finished in ebony real wood veneer. Since wood is a natural product, both colour and grain patterns may vary.
