

ProAc RESPONSE CC TWO

Acknowledging the recent trend towards more elaborate and powerful home theatre systems, we are delighted to introduce the new Response CC Two.

Following the highly successful CC One, this radical new design delivers greater bandwidth, higher output and increased accuracy, without sacrificing any of the smooth, open performance of its smaller brother.

Since most of the dialogue and an increasing proportion of sound effects are relayed through the centre channel the priorities in this design have been accuracy, naturalness and minimal colouration. This is especially important when playing the latest generation of music DVD's.

At the hub of the CC Two design is a pair of completely new polypropylene bass/midrange drive units which were produced to our own design specifically for the CC Two. These exciting new drivers, featuring lighter voice coils and shielded magnet assemblies, maximise the superb midrange reproduction and clean bass performance associated with other fine ProAc designs using high quality polypropylene cones.

ProAc RESPONSE CC TWO

New levels of centre
channel sophistication

 **ProAc**
perfectly natural

ProAc **RESPONSE CC TWO**

Housed in a rigid and heavily damped enclosure and loaded by an equalised reflex port, these two drivers link seamlessly through a refined crossover network to a specially shielded version of one of our most expensive dome tweeters. This exceptional unit delivers extended yet smooth and detailed high frequency performance.

The overall result is a centre-channel unit which can handle anything, especially high-output material, in new or conventional sound media. A perfect complement to ProAc loudspeakers, it is also perfectly compatible with other high quality home theatre loudspeaker systems.

Available in arrange of superb real wood veneers, the CC Two is available for demonstration through your nearest ProAc dealer.

Specification

Nominal Impedance	8 ohms
Recommended Amplifiers	25 to 250 watts
Frequency Response	25hz to 30Khz
Sensitivity	88db linear for 1 watt at 1 metre
Bass/Midrange Driver	6½" magnetically shielded units with special voice coil and magnetic system.
Tweeter	1" magnetically shielded silk dome with aircooling.
Crossover	Super grade PCB with finest components and multi-stranded branded cable.
Dimensions	28" (710mm) long 10" (254mm) wide 12" (305mm) deep
Weight	46lbs (21kg)
Mode	TV/Stand mounted
Grille	Acoustically transparent crimplene
Finish	Available in the following real wood veneers: Black Ash, Cherry and Mahogany. Yew available at a premium.

* Due to our policy of continuous improvement specifications are subject to change without notice. Cabinets pictured are finished in Cherry real wood veneer. Since wood is a natural product both colour and grain patterns may vary.
